Data acquisition and market intelligence

The Nordhaven quarterly **Software Report** covers the Nordic landscape of IP-based software companies across the Nordics based on 3rd party databases and our daily interaction with the market as an M&A advisor.

Our primary source is Mergermarket.com.

¹Consultancies, IT-services and resellers are not included. Neither are media and gaming software with significant content creation. Hardware-oriented business models with significant COGS have been excluded. Minority transactions, IPOs or transactions that does not create a "change-of-control" situation have also been excluded. Transactions below 5 USDm (known or assumed deal value) have not been included.

KEY OBSERVATIONS:

Consistent deal volume from previous quarter

- Nordhaven identified 32 software transactions in Q1 2025 in the Nordic region. This is the same number of identified transactions as during Q4 2024 but an 14% increase from Q1 2024.
- Denmark was the most active country in terms of deal volume, followed by Sweden and Norway.
- Deal volume in the last twelve months (Q2 2024 – Q1 2025) counts 118 transactions, a small increase from 117 transactions in Q2 2023 – Q1 2024.
- Despite Q1 2025 showing continued strong interest in Nordic SaaS-companies, recent macroeconomic events may provide uncertainty to transaction volume going forward.
- During Q1 2025, approximately 75% were acquired by private equity, either as platforms or add-ons. The remaining 25% were acquired by trade buyers.
- Listed international software companies are trading at EV/Sales 2025e of 7.1x, a slight decrease from 7.4x in Q4 2024. Listed Nordic software companies are trading at EV/Sales 2025e of 3.3x, a decrease from 3.6x in Q4 2024.
